Summary

AI Architek designing and running autonomous multi-agent systems in production. Not one harness: a fleet of them — Hermes, a DeepSeek harness, and focused worker harnesses, each a full runtime with its own memory, sessions and scheduled work — routing tasks to specialist sub-agents (OpenCode / Cline / Codex). A council of models — each LLM an independent policy aggregated by a reward model — returns one high-confidence answer; persistent cross-session memory keeps design intent alive. 600+ versioned skills load on demand; when the agents lack a capability, I build it: a new agent, a sub-agent, a custom skill, or an MCP plugin. Shipped end-to-end: an AI real-estate platform with Colombian legal compliance (**Pequi, live**), an on-chain x402 payment facilitator listed in the **Coinbase ecosystem**, and Colombia's first public real-estate API monetized with the **c402 HTTP-402 protocol**. Go, Rust & CRM middleware (axum, HMAC webhooks, SSE). MCP servers on the latest 2026-07-28 stateless Streamable HTTP spec. Bilingual EN/ES, US time zones, owner from architecture to deployment.

AI Architecture & Agent Systems

SWARM // 24/7

Agent Swarm

// orchestrator decides · routes · verifies

Specialist sub-agents build in parallel — one task per agent, isolated workspaces. No self-report trusted until verified. Runs 24/7 in production on DigitalOcean with an always-on security lane.

COUNCIL // RELIABILITY

Council of Models

// reliability at the answer level

High-stakes questions routed to specialist LLMs as independent policies. Reward-model aggregation returns the single highest-confidence answer.

PIPELINE // SPEC-FIRST

Verification & Security Lane

// spec-first pipeline

3-stage gate before merge: lint → typecheck → integration. Secret-scanning across repos/logs, credential hygiene, spend monitoring.

Projects — S.D.A.E. Ecosystem

// Sustainable · Decentralized · Autonomous · Ecosystem

01 Pequi LIVE

`Next.js 16` `React 19` `Clerk` `Wompi` `Prisma` `DeepSeek V4` `GRPO roadmap`

AI real-estate platform for Colombia. Ley 820-compliant contracts, payments, 15 AI tools, multi-agent chat. Live in Ibagué + Bogotá (276 barrios), c402 monetization.

VISIT →

02 MCPVOTS LIVE

`Solidity` `Base` `Chainlink VRF` `ERC-1155` `USDC` `Hardhat`

"Stripe for AI agents": on-chain x402 payment facilitator — autonomous agent-to-agent payments on Base mainnet. Coinbase-ecosystem listed; full test coverage, on-chain verification.

VISIT →

03 MCPVotsAGI

`Python` `AsyncIO` `WebSockets` `Redis` `PyPI`

Multi-model consensus SDK — specialist LLM outputs aggregated by reward model into one high-confidence answer. A2A protocol gateway, Redis-backed persistent memory. **pip install mcpvotsagi**

VISIT →

// PROTOCOL — 04

xpequi-api + c402 Protocol

`REST API` `Open Finance` `TS SDK` `Python SDK` `MCP Server` `IPFS`

Colombia's first public real-estate data API — **18 endpoints, 276 barrios**. c402: Colombia-first HTTP 402 fiat rails (Wompi · PSE · Nequi · Daviplata) with zero-crypto settlement — agents and apps pay per request through local payment rails, no wallet required.

Work Experience

Co-Founder & Full-Stack Developer — Village of Thousands

2021 – Present · Remote

- Headless e-commerce: React + Shopify on Vercel, DigitalOcean backend (99.9% uptime).
- Created brand identity — graffiti-inspired design language; NYFW-featured.

Digital Marketing Manager — PolloRiko.io

2018 – Present · Houston, TX (Remote)

- Full digital presence for US restaurant chain: web, SEO, social, AI-generated content.

Customer Service — United Health Care (Teleperformance)

2020 – 2021 · Ibagué, Colombia

- EN-language support for US members; high CSAT on US time zones.

Banquet Captain — Hilton Bonnet Creek

2017 – 2018 · Orlando, FL

- Led service teams for large-scale corporate events; luxury service standards.

Education & Certifications

Computer Programming and Analysis

Valencia Community College

Orlando, FL · 2004 – 2008

AMD AI Academy — Certified

3 AMD Certifications

- AI on AMD Instinct GPUs
- Hugging Face on AMD
- Kubernetes on AMD Instinct

Continuous self-directed learning verified through shipped production products.
