

ALDO VILLAMIL

AI Architect · Full-Stack Engineer · Web3 Builder · Co-Founder

Aldo728@gmail.com | +57 318 318 9499 | Ibagué, Colombia (US hours) | mcpvot.github.io · xpequi.xyz · mcpvot.xyz · github.com/MCPVOT

SUMMARY

AI Architect — I design and run autonomous multi-agent systems in production.

Orchestrating harness routes work to specialist agents; a council of specialist models — each LLM an independent policy aggregated by a reward model — returns one high-confidence answer; persistent cross-session memory keeps design intent alive. Shipped end-to-end products: AI real-estate platform with legal compliance (Pequi), on-chain agent-payment facilitator (x402), public data API with HTTP-402 monetization (c402). Bilingual EN/ES, US time zones, owner from architecture to deployment.

AI ARCHITECTURE & AGENT SYSTEMS

Agent swarm	Orchestrator decides, routes, verifies; specialist sub-agents (OpenCode, Cline, Codex) build in parallel — one task per agent, isolated workspaces, every output verified. Runs 24/7 on DigitalOcean.
Council of models	High-stakes questions routed to specialist LLMs; outputs aggregated by a reward model into the single highest-confidence answer — no model trusted blindly.
Persistent memory	Cross-session memory keeps requirements, decisions, and intent intact across builds — the layer that lets the system self-improve.
Verify & secure	Spec-first pipeline with a 3-stage gate (lint → typecheck → integration); always-on security lane: secret-scanning, credential hygiene, spend monitoring.

TECHNICAL STACK

AI / Agents	DeepSeek V4 · OpenRouter · Groq · Hermes Agent · OpenCode · Cline · Codex · MCP · A2A · multi-model consensus
ML / RL	PPO · GRPO · RLVR · reward-model aggregation · fine-tuning
Languages	TypeScript · Python · Solidity · SQL · Rust
Web	Next.js · React · Tailwind CSS · Three.js / R3F · Prisma · PostgreSQL (Neon) · Redis (Upstash)
DevOps	GitHub Actions CI/CD · Vercel · DigitalOcean · Docker · Kubernetes (AMD Instinct) · n8n · VoltAgent · Sentry
Web3	Base · Ethereum · Solana · Chainlink VRF · ERC-1155 · x402 / c402 · Wompi · ENS · Farcaster · IPFS

FLAGSHIP PROJECTS

Pequi — AI real-estate platform (live) · Next.js · Clerk · Wompi · DeepSeek V4

Ley 820-compliant contracts, payments, 15 AI tools, multi-agent chat with GRPO roadmap; live in Ibagué + Bogotá (276 barrios).

MCPVOTS — on-chain x402 facilitator · Solidity · Base · Chainlink VRF · ERC-1155 · USDC

“Stripe for AI agents”: autonomous agent-to-agent payments on Base mainnet; Coinbase-ecosystem listed; full Hardhat coverage.

MCPVotsAGI + xpequi-api — consensus SDK & public API · Python · AsyncIO · WebSockets · Redis

Multi-model consensus SDK (reward-model aggregation, A2A gateway); Colombia’s first public real-estate API — 18 endpoints, c402 monetization, TS + Python SDKs, MCP server.

WORK EXPERIENCE

Co-Founder & Full-Stack Developer — Village of Thousands

2021 – Present · Remote

Headless e-commerce: React + Shopify on Vercel, DigitalOcean backend (99.9% uptime); created brand identity — NYFW-featured.

Digital Marketing Manager — PolloRiko.io

2018 – Present · Houston, TX (Remote)

Full digital presence for US restaurant chain: web, SEO, social, AI-generated content.

United Health Care (Teleperformance) — Customer Service

2020 – 2021 · Ibagué, Colombia

EN-language support for US members; high CSAT on US time zones. · Earlier: Banquet Captain, Hilton Bonnet Creek, Orlando FL (2017–18) — led large-event service teams.

EDUCATION & CERTIFICATIONS

Education	Computer Programming and Analysis — Valencia Community College, Orlando, FL (2004–2008)
Certs	AMD AI Academy: AI on AMD Instinct GPUs · Hugging Face on AMD · Kubernetes on AMD Instinct
